## REPORTS

The necessity to measure and track staff progress is imperative to district administrators. This ensures knowledge is obtained and provides documentation.

The reports are comprehensive and incorporate visual representations of data. Designated district and campus personnel can view and export reports.

The progress, degree of knowledge, and the certificate can be examined within the system.

## TIMELINES

Unique to Eduhero is a specialized timeline. After a user enrolls in a course, the timeline is automatically generated. It indicates the user's progression and will show the number of attempts before passing.

# PLANS

Plans allow administrators to create customized menu of courses for their district, campus, or individual staff members. The plans can be assigned a due date and are easily tracked. Instead of going through each course and user, you can view the completion by each plan.
